

Mission/Creek Floodplain Restoration, Phase 3 (Nez Perce CD)

Program	Watershed Restoration
Lead Implementer	Nez Perce Conservation District
Funders	Bonneville Power Administration, Governor's Office of Species Conservation, Idaho Soil and Water Conservation Commission, Nez Perce Conservation District
Other Organizations	Nez Perce County
Project Primary Contact	Lynn Rasmussen (npswcd@co.nezperce.id.us)
Project Stage	Completed
Duration	2020

Natural Resource Projects & Practices ➤ Watershed Restoration

Mission/Rock Creek does not meet State water quality standards due to excess sediment, nutrients, bacteria levels, high stream temperatures. Does not meet NOAA limiting factors for ESA-listed steelhead for excess sediment channel/bank form and habitat complexity. Goals: improve in-stream aquatic habitat, reduce sediment transport to Mission Creek, and increase floodplain connectivity.

No Key Photo provided

- Phase 3 – Protection of public and private infrastructure, connection of stream to 100 year floodplain, and addition of large woody debris to provide floodplain roughness and steelhead in-stream habitat complexity.

For more info, contact district.

Key Accomplishments

- Fish Stream Improvement (number): 1

Project Themes

- Habitat and Species
- Healthy Watersheds
- Water

No additional photos provided

Tracker tells stories at a broad-brush level. Individual project performance measures and expenditures should not be relied upon for complete and total accuracy and should be confirmed with a project's lead implementer. Project locations subject to confidentiality provisions under state and federal law specify the location of a local conservation district or USDA service center office.
